INFANT FEEDING IN SUMMER

The problem of substitute infant feeding becomes more complicated with the advent of the hot months. The milk supply of most communities is bad enough at all times, but in summer it presents grave dangers to the bottle-fed infant. Most peddled milk contains an enormously high bacterial content, and the use of preservatives is by no means uncommon. Even pasteurization of milk, once it is tainted, does not eliminate danger.

The rational solution lies in the use of

HIGHLAND BRAND EVAPORATED CREAM

Simply the purest of cow's milk produced on model dairy farms—reaching the factory in the shortest time after leaving the cow, and handled with most scrupulous cleanliness—and sterilized and evaporated by a process which makes it easy of digestion and gives **absolute protection against all germs and other impurities.** It is the simplest, most uniform and satisfactory substitute food.

Livermore Sanitarium

THE SANITARIUM FOR NERVOUS AND GENERAL DISEASES is beautifully situated near the town of Livermore, 30 miles from San Francisco, and is surrounded by handsome grounds. It is isolated, the rooms are large and well furnished and the Sanitarium is specially adapted for the treatment of Neurasthenia, Nervous Dyspepsia, the Alcohol Habit and Morphomania. One building is especially adapted for Massage, Electricity, Hydrotherapy and Sun Bath. Terms \$20 to \$35 per week.

THE DEPARTMENT FOR THE TREATMENT OF MENTAL DISEASES is entirely separated from the Sanitarium and is located in grounds absolutely private. The central building is surrounded by small cottages for the better segregation of patients. The best-trained nurses are employed and all modern appliances for the proper care of the insane have been provided. Absolutely no restraint nor enclosures for patients. Terms \$25 to \$50 per week, depending upon the number of nurses required.
